Comet Showcased in Gartner Group Cool Vendor Report

Cincinnati, OH — May 3, 2010

Gartner Group's Cool Vendors in Product Design and Lifecycle Management 2010 Report (published April 27) showcases Comet Solutions.

Dr. Marc Halpern, Gartner Group Research Director writes that organizations seeking innovative software for systems engineering and multidisciplinary design, particularly involving mechanical design and optics, should evaluate Comet Solutions. Dr. Halpern adds that Comet bridges the gap between Computer-Aided Engineering and Systems Engineering delivering multi-disciplinary design support not previously achieved - at a relatively low cost and time to become productive.

What makes Comet cool? Comet addresses one of the most difficult and under-served challenges in product development today. That is, Comet enables a multi-disciplinary systems level approach to product design that is connected to other product development software capabilities yet can also support detailed design.

Gartner writes that Comet's approach is more modern, much easier to deploy and use, and more cost effective. Product development managers and engineers with systems level responsibility for product design should investigate Comet Solutions.

"It's great for Gartner to recognize Comet as an innovator bringing breakthroughs to a seemingly mature market. Our industrial and optronics customers are realizing dramatic improvements in engineer productivity and from the impact of simulation on product design." said Mr. Dan Meyer, President and CEO of Comet Solutions.

The report is now [posted on the Gartner website](#) and is available to Gartner clients only.

About Gartner:

Gartner, Inc. (NYSE: IT) is the world's leading information technology research and advisory company. Gartner delivers the technology-related insight necessary for its clients to make the right decisions, every day. From CIOs and senior IT leaders in corporations and government agencies, to business leaders in high-tech and telecom enterprises and professional services firms, to technology investors, Gartner is the indispensable partner to 60,000 clients in 10,000 distinct organizations. Through the resources of Gartner Research, Gartner Consulting and Gartner Events, Gartner works with every client to research, analyze and interpret the business of IT within the context of their individual role. Founded in 1979, Gartner is headquartered in Stamford, Connecticut, U.S.A., and has 4,000 associates, including 1,200 research analysts and consultants in 80 countries. For more information, visit www.gartner.com.

About Comet Solutions, Inc.

Comet Solutions, Inc. enables manufacturers to achieve a simulation-driven product development process guided by engineering intent--improving R&D productivity and reducing total costs. Comet software is an integrated conceptual modeling and collaborative process automation workspace in which engineering project teams evaluate design concepts vs. engineering requirements starting in the early stages of product definition and feasibility trade studies. Performing analyses rapidly through reusable, tool-neutral simulation templates powered by Comet's unique abstract modeling capabilities, engineers and designers gain insight into product performance much earlier in the product design process and make better informed decisions. With Comet software, companies exploit the full potential of their existing CAD/CAE/PLM tools and explore more design alternatives, enabling the rapid development and delivery of more innovative, higher quality, and cost-effective products. www.cometsolutions.com
